September 1, 2025, Yusuke was Sagarika Manjunath's mentor

All LinkedIn members On

I had the chance to mentor Sagarika Manjunath Chavan during her internship at Cubic Innov8, where she worked on an AI-driven predictive remediation project for SOC teams.

She applied machine learning and NLP techniques on Microsoft's GUIDE Security Incident Dataset, using models like XGBoost, Random Forest, and CatBoost to build a framework that could help SOC teams triage incidents more efficiently. Her report and GitHub contributions were clear, well-structured, and showed her ability to connect technical research with real-world applications.

What stood out to me was her analytical mindset and curiosity to learn. She was proactive in exploring complex challenges like class imbalance and feature engineering, while also asking the right questions about how such projects fit into the bigger cybersecurity landscape.

Sagarika has strong potential to grow in both AI/cybersecurity industry roles and academic research. I'm glad I had the opportunity to work with her and I wish her every success in her career ahead.

I had the pleasure of working with Sagarika when she first joined our team as an intern. From day one, she demonstrated a strong sense of ownership, a keen eye for detail, and a remarkable ability to get things done. It was no surprise that she transitioned seamlessly into a full-time role, where she continued to excel as a software developer.

Sagarika is a quick learner who not only adapts to challenges but thrives on solving them. Her technical expertise, combined with her structured approach to problem-solving, made a significant impact on our projects. She consistently delivered high-quality solutions, showing both precision and efficiency in her work.

As she embarks on her journey for higher studies, I have no doubt that she will continue to achieve great things. Any team would be lucky to have her, and I look forward to seeing all that she accomplishes in the future. Wishing her all the best!

Harsha Vardhan CV · 1st

I highly recommend Sagarika Manjunath Chavan who I closely worked with, developing a frontend tool to seach and visualize metadata to help the development of ADA.

Sagarika is a quick learner and easy to work with, she eager to learn new technologies apart from frontend she is also good at NLP and ML.

She actively involved in other activities like organising department events.

She'll be a great addition to any team she joins.

Sagarika is working in Automated Driving Visualisation team in Bosch right from past 2 years. I am responsible as the Product Owner for this team.

She has quickly picked up on technical skills React, Angular and python. Her transition from a UI developer to a Full stack developer is truly commendable.
Sagarika has very high level of commitment to work and delivers high quality code for any given requirement.

In a very short span of time Sagarika has picked up the ADAS Deep learning loop domain knowledge and understood all the aspects. This has translated her in taking up full ownership of components and end-to-end delivery.

Sagarika has consistently delivered and demoed all the features developed to the relevant stakeholders in Sprint review. She has worked in complex solutions such as Search and map development. She is proactive and reaches out for open questions and clarifies it. She is assertive and has very good communication skills.

Sagarika is a great team player, always pitches in and delivers on time.She is a talented, confident, smart, hard-working individual and it has been a great pleasure working with her.

Sagarika will be a great asset to any team she joins !!!

All LinkedIn members On

I am delighted to recommend Sagarika Manjunath Chavan for any professional opportunity. In my role as Project Manager at BOSCH, I have had the privilege of working closely with Sagarika for 2 years and I am confident in her exceptional abilities and dedication.
Sagarika has consistently showcased a remarkable aptitude for both frontend and backend development, contributing significantly to ADAS project and team initiatives. Notably, her proficiency in REACT has been instrumental in achieving key milestones, exemplified by Go-Live of the Flagship-Search solution in the ADAS /PACE Project House.
What sets Sagarika apart is her exceptional learning nature, including effective

communication, teamwork, and problem-solving. Sagarika brings a proactive approach and resilience to challenging situations, making her an invaluable asset to our organization.
Beyond technical competencies, Sagarika is known for active contributions in team building initiatives. She maintains a positive and collaborative attitude, fostering a harmonious work environment. Her dedication to company values further exemplifies her commitment to excellence.
I am confident that Sagarika will bring the same dedication, skill, and positive energy to any endeavour she pursues.
Sagarika Manjunath Chavan has my highest recommendation, and I believe her contributions will continue to have a lasting impact.

Sagarika and I worked on the same team for our final year capstone project. She was a very valuable team member who's always hardworking and makes sure to muster her utmost dedication when it comes to her work. Her optimistic attitude was infectious and played a crucial role in maintaining the team's dynamic. I'm sure she would be a valuable member to any team irrespective of the kind of work. I am pleased to have worked with her on our project, which she pillared and led to a successful completion.

Sagarika has been a classmate of mine since first year of University and has ever since become a close friend of mine.
Her never say die attitude, followed with rigour, passion and honesty in all facets of her life is what makes her an incredible person, both to work with and to talk to

her life is what makes her an incredible person, both to work with and to talk to.
Her need to perfect everything and deliver it accordingly is what I admire about her the most, and her approach towards problems and the way she has grown in 4 years is truly admirable.
Any person would be happy to work with her, as she is truly a good sport and an irreplaceable friend. I am happy to know her and hope to work with her in the future .

Sagarika is a gifted developer with a rare combination of patience, spunk, and research skills.
I'm extremely glad to have worked with her. I've seen her go above and beyond in learning and working on new technologies. I've worked on 5 projects with her and I must say, I could have never asked for a better teammate.
I was impressed by her ability to handle any situation calmly and patiently, even with the toughest targets.

Looking forward to more working and tapping into new fields with you
